A great way to improve and maintain important health behaviors is to record your experiences as you engage in various activities or programs designed to promote health and prevent disease.

Be Ready - June 2010
Program Guidelines

- Improve your emergency tools, kits, supplies, or action plans each day during June.
- Think about, review, or discuss some aspect of emergency planning or preparation.

How did I do? What was most difficult? What small improvements have I made in my emergency preparedness? Why does my health and safety matter to me? Write whatever helps you to help yourself improve, change, and grow. This is for your personal record and benefit only. Do not submit.
